

TERRITORY RESTRICTIONS APPLY

Exclusive TotalShield technology makes this top of the line detector invisible to radar detector detectors. Plus, with 360° protection, this is the best detector for the professional driver.

STi DRIVER

Operating Bands:
X-band; K-band; Ka-band; Laser

Radar Receiver:
Dual LNA Microwave Receiver
Superheterodyne Varactor-Tuned VCO
Scanning Frequency Discriminator & D.S.P.
TotalShield™ VG2 & Spectre Immunity

Laser Detection:
5 Optical Laser Sensors

Display Type:
280 LED Alphanumeric w/Bar Graph
ThreatDisplay™; Tech Display™
3 Levels of Brightness & Full Dark Mode
Crystal Clear Voice Alerts

Programmable Features:
Display; Power-On Indication; Alert Lamp;
AutoMute; Voice Alerts; Signal Strength Meter;
Selectable Brightness; Selectable Bands

Sensitivity Control:
AutoScan™, Highway, City, City NoX

Includes:
Owner's Manual & Quick Reference Card
Windshield Mount & Metal Travel Case
Coiled SmartPlug & Direct Wire SmartPlug
Amplified 12V Speaker

360° laser protection. GPS powered technology provides relief from false alarms. Proloaded with thousands of red light and speed camera locations throughout North America.

GX65

Operating Bands:
X-band; K-band; Ka-band; Ku-band; Laser

GPS Receiver:
SiRFStar

Radar Receiver:
Superheterodyne Varactor-Tuned VCO
Scanning Frequency Discriminator & D.S.P.
SmartShield™ VG2 Immunity

Laser Detection:
360° Multiple Laser Sensor Diodes

Display Type:
280 LED Alphanumeric w/Bar Graph
SpeedAlert™; ThreatDisplay™; Tech Display™
5 Levels of Brightness & Full Dark Mode
Crystal Clear Voice Alerts

Programmable Features:
Power-On Indication; Speed Check; Signal Strength
Meter; AutoMute; Units (English / Metric); Voice
Alerts; Selectable Bands; Selectable Markers

Sensitivity Control:
AutoScan™, Highway and Auto NoX

Includes:
Owner's Manual & Quick Reference Card
Quick Release Windshield Mount
Coiled SmartPlug & Travel Case

Extreme sensitivity to all Radar and Laser bands with over 10 times the range of other detectors. Featuring Mute and AutoMute technology on the included SmartPlug power cord.

RX65RED

RX65BLUE

Operating Bands:
X-band; K-band; Ka-band; Ku-band; Laser

Radar Receiver:
Superheterodyne, VTO
Scanning Frequency Discriminator & D.S.P.
Shadow Technology® VG2 Immunity

Laser Detection:
360° Multiple Laser Sensor Diodes

Display Type:
280 LED Alphanumeric w/Bar Graph
ThreatDisplay™; Tech Display™
3 Levels of Brightness & Dark Mode
Crystal Clear Voice Alerts

Programmable Features:
Power-On Indication; Voice Alerts; Power-On
Sequence; Signal Strength Meter; AutoMute; City
Mode Sensitivity; Radar/Laser Bands

Sensitivity Control:
Highway, AutoScan™ and City

Includes:
Owner's Manual
Quick Release Windshield Mount
Coiled SmartPlug & Travel Case

Our patented "Speed of Light Protection" is the most advanced defense against targeting laser guns. Includes 2 front mounted and 1 rear mounted laser transceivers. The exclusive design allows you to connect the ZR4 to select Beltronics radar detectors (RX65 Blue, RX65 Red, STi, Vector 995, Vector 965, Vector 955, Vector 940, RX75 and RX75 Plus)

ZR4

Operating Bands:
Laser: 904nm, 33MHz bandwidth

Laser Detection:
Quantum Limited Video Receiver
Multiple Laser Diodes

Laser Transmitter:
Multiple Laser Shifting Diodes

Display Type:
LED Indicators
Automatic Brightness Control

Power Requirement:
12VDC, Negative Ground

Includes:
Owner's Manual
Install Manual
Twin Front Mount Laser Shifters
Rear L.P. Mount Laser Shifter
In-Car Display Controller
Remote Mute Button
All Mounting Hardware

STi-R PLUS

STi-R PLUS SHIFTER

The Best Undetectable Radar Laser Detector Now Includes GPS Capabilities!

- **GPS Enabled Location Awareness** w/Updateable Defender Database - Alerts To Thousands Of Red Light & Speed Cameras Throughout North America
 - **Total Shield™ Stealth Technology** - Invisible To Any Radar Surveillance
 - **M3 Dual Antenna Design** is the platform and radar receiver used in Bel STi Driver, STi-R, Escort RedLine, and Passport 9500ci. Dual-antenna design yields the best range and sensitivity available.
 - **ShifterPack** - Provides Enhanced Protection Against Laser Targeting
 - **Ka-Band Segment Filtering** disables specific segments of the Ka-band that are not used in your area. Improves response time against Instant-On or Quick-Trigger threats. Exclusive to STi-R Remote and the new STi-R Plus only.
 - **RDR Mode** - Scans frequencies that other detectors use and if found, suppresses false alarms. Can be disabled, allowing the detector to scan police frequencies instead of radar detector frequencies, speeding detection of instant on and quick trigger threats.
 - When these modes are used together (unused segments are turned off, and RDR is turned off) it allows maximum detection speed. Ka-band falses from other detectors are usually on frequencies that the police do not use in America, so when you turn those segments off, there's no need to scan the radar detector frequencies because you'll already have suppressed the false alarms. Your detector will also be able to detect bursts of instant on and quick trigger much better when it isn't scanning unused frequencies.
- Other Features Include:**
- Easy To Use Programming
 - Modular Plug & Play Telephone Jack Connections With Color Coded Cables For Quick & Easy Installation
 - Voice Alerts For Radar, Laser and Up To 64 Safety Warning System Messages
 - Monitors Vehicle Speed To Provide Maximum Radar Sensitivity At Higher Speeds, While Decreasing X and K Band Sensitivity At Lower Speeds To Minimize False Alerts
 - Instant Kill Panic Mode removes both radar and laser functionality of the system, turning it into a simply a GPS camera locator.

Fully Integrated, High Performance Radar & Laser Detector System. Optional RX45 Shifter Pack Allows Laser Shifting Technology (Front Only) For Increased Overall Protection.

RX45

SHIFTERPACK

Operating Bands:
X-band; Ku-band; K-band; Ka-band; Laser

Radar Receiver:
Superheterodyne GaAs FET VCO
Scanning Frequency Discriminator & D.S.P.
VG2 Immunity

Laser Detection:
Quantum Limited Video Receiver

Display Type:
280 LED Alphanumeric w/Bar Graph
ThreatDisplay™; Tech Display™
3 Levels of Brightness & Full Dark Mode

Programmable Features:
Display; Power-On Indication; Alert Lamp;
AutoMute; Voice Alerts; Signal Strength Meter;
Selectable Brightness

Sensitivity Control:
AutoScan™, Highway, Auto NoX

Includes:
Owner's Manual
Quick Reference Card
