

## BASE

The eAsy foundation builder "Base"!

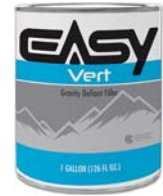

This is the foundation of all of our filler products. Use this product to create an amazing filler of your own or as a cost effective filler for high build applications that require a lot of material.

## MASS

The eAsy composite strand filler "Mass"!

This composite strand filler is always smooth! When using this product you can rest assured that its fresh and mixed to perfection, no clumped fiberglass here. Once you use this product you won't ever go back to the parts store "Kitty Hair" you have had to settle for!

## VERT

The eAsy Gravity Defiant Filler "Vert"!

This light weight filler is special formulated to stay in place. Once you use this product you won't ever go back to the parts store filler you may be used to.

## MATTER

The eAsy final stage filler "Matter"!

This light weight filler is special formulated to sand smooth for finishing. Once you use this product you won't ever go back to the parts store filler you may be used to.

## SPREAD

The eAsy spread is a self leveling, final stage filler "Spread"!

This light weight filler is special formulated to sand smooth for finishing. Once you use this product you won't ever go back to the parts store filler you may be used to.

## LAYUP

**MEKP** (Pickup Only - No Shipping)

Hands down the best Resin we have tested. Chosen as the main ingredient in all the eAsy filler products our LayUP resin is thin so it wets out fast.

The natural color is easily tintable with our available pigments and check out our additives for mixing and adapting this premium resin to your specific application.

You'll find our proven mix ratio chart located on the back of every container to ensure the perfect ratio, cure time and minimize shrinkage every time.....too eAsy.
