HID ACCESSORIES

CANCELLERS   Computer Warning Canceller

CANBUS Relay Harness solves error messages and flickering by simulating factory halogen bulbs. Recommended for all cars - especially with computer controlled headlights, but commonly needed for BMW, Mercedes, Audi, Chrysler, Dodge & Jeep. Plugs inline into HID harness.

RELAY   DRL Bypass Relay Harness

Connects the HID kit directly to the vehicle's battery, instead of drawing from the factory wiring. Eliminates Daytime Running Lights, protecting the factory wiring and extending the life of the HID ballasts. No cutting or splicing required. OEM socket connection allows you to activate headlights using the factory switch.

WCW   C3 Warning Canceller

50w 6 Ohm HID Resistor Warning Canceller
