

SiriusConnect Tuner

SCC1

SiriusConnect Universal Vehicle Tuner

- Includes Mini Magnetic Car Antenna; SiriusConnect Interface Cable; Removeable Mounting Plate; Installation Manual.

SUVA2

Low Profile Magnet Mount Antenna w/Micro Coaxial Cable

SIRMARINE

Compact Waterproof High Performance Marine Antenna

SIREXT50

50' XM Indoor/Outdoor Extension Kit With Built-In Amplifier

SIRSP

XM Single Output Antenna to Dual Input Receiver Splitter

SRB-MM

Truck Mirror Mount Bracket for use with SIRMINI

XMDirect Tuner Kit

CNP2000UCA

XM Direct Add On Receiver with Mini Tuner

- Includes Mini Magnetic Car Antenna, Mini Tuner, Interface Adapter and USB Cable.

XMDirect Smart Digital Adapters

CNPALP1	Alpine Cable
CNPCLA1	Clarion Cable
CNPECL1	Eclipse Cable
CNPJEN1	Jensen Cable
CNPJVC1	JVC Cable
CNPKEN1	Kenwood Cable
CNPPAN1	Panasonic Cable
CNPSON1	Sony Cable

Connects CNP2000UC Tuner Box To SAT Ready Head Units

XMICRO2

Low Profile Magnet Mount Antenna w/Micro Coaxial Cable

XMARINE

Compact Waterproof High Performance Marine Antenna

XMEXT50

50' XM Indoor/Outdoor Extension Kit With Built-In Amplifier

XMSP

XM Single Output Antenna to Dual Input Receiver Splitter

SRB-MM

Truck Mirror Mount Bracket for use with XMICRO2

MOBILE MOUNT

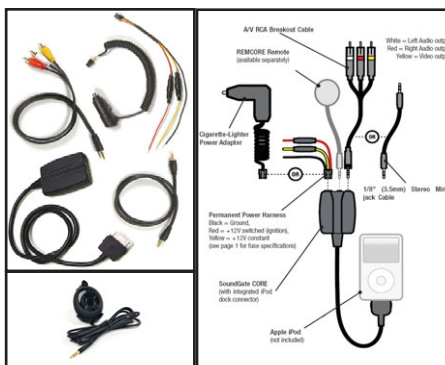

M2

M2 Mobile Mount - It's the universal holder for everything in a vehicle, and when not in use it can be conveniently folded down sleekly and smartly on the dashboard. It's the M2, the patent pending mobile mount for keeping all portable devices safely out of the way.

The M2 can be used to hold anything - MP3 player, mobile phone, PDA, NAV unit - in the correct position, instead of out of the driver's reach or causing a safety risk. A thin disk adhered to the back of the portable device is the locking connection to the M2, and locking or unlocking can be achieved with just one hand.

A special 3M tape provides the stoutest fixation to a dashboard, and it can be removed at any time without trace or damage to the dash itself or the device.

iPOD & ZUNE INTEGRATION

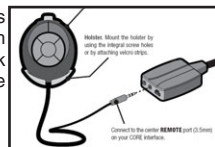

PDCBLPAK

ZNCBLPAK

iPod & Zune Interfaces - Consists of the CORE for iPod, a 3.5mm to AV RCA cable, 3.5mm to 3.5mm cable, cigarette lighter charger, and a 3-wire power cable for optional hardware installation. The included cables allow for connection to any source unit with RCA or 1/8" (3.5mm) audio inputs. The PDCBLPAK also provides iPod video output via a composite RCA jack. CORE for iPod will also supply power and charge.

REMCORE

Wired Remote - Allows control of iPod through CORE interface. Quick mount holster & hardware included.

OEM INTERFACES

LANSTAR1

Select GM Non-Amplified

LANSTAR2

Select GM Amplified

OnStar Interface - Allows you to replace the factory radio in select OnStar equipped General Motors vehicles without losing OnStar, warning chimes, RAP (retained accessory power), or turn signal audible indicator (using additional relay, not included). LANSTAR2 also creates a digital turn on and interfaces RCA level audio for the factory amplifier.

GMACC

R.A.P. Interface - Provides a RAP ignition in many 2001 and newer GM vehicles. Provides a +12 Volt accessory (switched) output (10 Amp Maximum load) in GM vehicles with the Class2 data bus.

GMCHIME

Chime Retention - Retains chime in various 2001-2003 and newer General Motors vehicles which route the factory chimes through the factory radio. GMCHIME also includes a RAP ignition lead output for those cars missing a radio ignition lead. Use when the factory amplifier is not being retained, or when connecting to a non-Bose amplifier.
